

Lightning Presentation

Details

5th Urban Street Symposium

May 22-24, 2017

Raleigh, North Carolina

- Prepare your slides well in advance and submit them to the USS5 website
- Ensure that you can deliver your prepared comments within 5 minutes

The Symposium session rooms will contain a laptop computer and projector to display podium lightning presentations for speakers and attendees.

Presenters should plan to arrive 15 minutes before the session to ensure that presentation files are loaded and displaying properly. Presenters are encouraged to provide their presentation files in advance to the USS5 website, so that all files can be loaded onto the computer prior to the session. Presenters are also encouraged to bring a backup copy of their presentation files on a USB drive if desired.

Lightning Session presentations have a strict limit of 5 minutes for your prepared comments, plus 3 minutes for Q&A; in order to be fair to all speakers a timer will be used. Presenters must ensure that their presentations will be completed within the time limit.

TRB has some helpful suggestions for preparing and delivering presentations on their website at <http://onlinepubs.trb.org/onlinepubs/am/2017/AVAids.pdf>.
