

Amsterdam - The Netherlands 28 June-1 July 2020

Featuring the 6th Urban Street Symposium

SMART HIGHWAY AND STREET DESIGN, READY FOR THE FUTURE

TOPICS

Geometric
Highway Design

Integral Design

Urban Street
Design

Design
Applications

Challenges and
Innovation

Call for Abstracts

The 6th International Symposium on Highway Geometric Design aims to encourage the continuous improvement of highway geometric design.

This Symposium presents an international network of highway and street design experts, from research and knowledge institutes, universities and higher education, major engineering consultants and highway contractors, national, regional and local road authorities.

Interactive workshops, encouraging a more active participation by all delegates, are aimed at sharing insights in thematic discussions, leading to valuable conclusions and recommendations for future designs.

6th Urban Streets Symposium

In 2020 the International Symposium for Highway Geometric Design is featuring the Urban Streets Symposium. For the first time USS will be a global symposium, hosted outside the USA. Besides topics on Highway Geometric Design the 2020 symposium is open for Urban Streets topics as well. We encourage authors to submit abstracts in the wide spectrum of infrastructure design.

Abstract submission is now open on www.ishgd2020.org. See other side for more details.

Topic suggestions

Listed below are examples of the types of specific topics that can be considered for each broad category. Please visit our website for more extended range of topics.

GEOMETRIC HIGHWAY DESIGN

- Network Considerations
- Freeways and Interchanges
- Special Highway Design
- Rural Roads

INTEGRAL DESIGN

- Road Guidance
- Workzones
- Constructions
- Traffic Management

URBAN STREET DESIGN

- All users
- Neighborhood Approach
- Urban Network
- Vulnerable Users

DESIGN APPLICATIONS

- Processes and Practices
- Road Safety
- Design Modelling
- Design Systems

CHALLENGES AND INNOVATION

- Challenges
- Impacts
- Smart Highway Design
- Innovation

Important Dates

12 January '19

Abstract submission open

1 June '19

Abstract submission deadline

1 June – 31 July '19

Review and acceptance of abstracts, invitation to write paper

1 August – 1 October '19

Authors submit draft papers

1 October – 31 October '19

Steering committee completes review

1 November – 31 December '19

Organize program schedules

January '20

Send notifications to authors

31 January '20

Publish final program

31 March '20

Authors submit final papers
